Kill Bill Clock is a desktop clock inspired by the same titled movie. This widget displays the current time in digital form, with the hour, minute and second. The widget also displays the day, month and year. The accuracy of the information displayed can be altered via the control panel. Kill Bill Clock features: \* Show or hide the date widget \* Alter the hour, minute, second, day, month and year clock \* Alter the date widget \* Set the timezone \* Current time, date, timezone, day, month and year can be displayed as a digital clock, a date widget or a regular clock \* Date can be shown in various forms \* Time can be shown in various forms The widget can be placed anywhere in the desktop, or any other widget can be place before it. Some widgets do not work with the Kill Bill Clock widget. For example, BubbleChart does not work with the Kill Bill Clock widget, even if BubbleChart is displayed directly before the Kill Bill Clock widget. For more information, please go to the documentation for the widget engine. [www.widgetengine.com](http://www.widgetengine.com) Thank you, Rohit Gunjal.Q: Simple Recursion in C++ I'm trying to solve a project euler problem, and I came across a solution on codeacademy that seems to me to be very simple. The problem I'm trying to solve is, "Given a string, how many ways are there to get a string that has 4 even numbers and 3 odd numbers" and the solution is the following: 

```
void count(char word[]) { static int even = 0, odd = 0; for (int i = 0; i < strlen(word); i++) { if (word[i] == '2') { even++; } else if (word[i] == '4') { odd++; } } count(word); if (even == 4 && odd == 3) { cout
```
