* Easy to install and easy to use: Just start LoopBe1 and it will do the rest * Automatic MIDI port detection * Switchable automation * MIDI ports are independent of the applications * Supports 8 inputs and 8 outputs * No software or drivers required * Its configuration parameters can be changed from the 'Control Panel' Installation: LoopBe1 is the first and only application dedicated to automatic MIDI data exchange. It can connect up to 8 applications together and allow data transfers throughout its ports. The application offers a real-time synchronization feature for its ports, which means that it will constantly monitor for the incoming and outgoing MIDI data from the source and destination applications. The clock is automatically set according to the program's parameters and the clock's parameters can be changed. LoopBe1 supports MIDI Port Detection. It means that it will not interfere with your work by preventing the application to access its input and output ports and will automatically stop the process when the issue is detected. The program features a variety of configuration parameters, such as time delay, number of connected ports and etc. Its 'Device Manager' section offers all information about the port's properties and functioning parameters. KEYMACRO is a small tool for Windows that enables you to create macros for MS Office keystrokes. For example, you can make the same operation via a combination of CTRL+S, CTRL+E, CTRL+F and CTRL+Q. KEYMACRO supports any number of macros and can also be saved to a registry key or any other format. For example, it can be saved in AutoHotKey format and imported to other applications. Once installed and started, KEYMACRO is automatically saved in the start menu, and if you have defined any key sequences in the Keystroke Editor, the program will immediately execute the macros you have defined. The title of the program is displayed when a macro is active, so you can easily find and remove any defined macros. - NO INCOMPATIBLE WITH OTHER PROGRAMS KEYMACRO is not a software that was written in order to be compatible with other programs or Windows, such as Microsoft Office. The macros created by KEYMACRO can be applied to any application. - YOU CAN CREATE FAST MULTIPLE MICE USING THE SAME MACRO If you save your macros in AutoHotKey format, you can use the same one for different Mice. You just need to change the numerical values. KEYMACRO Description: KEYMACRO is a small tool for Windows that enables you to create macros for MS Office keystrokes.
