## House Flipping Spreadsheet Crack With Serial Key PC/Windows

House Flipping Spreadsheet is designed to help house flipping investors determine the Maximum Purchase Price (M.P.P.) for their next investment property. This excel sheet will estimate cost of repair and renovation estimates that are specific to your property and over 200+ renovation and construction projects you can incorporate into your spreadsheet. Why use House Flipping Spreadsheet? You can quickly create an estimate and analyze whether or not a property is worth investing in. You can determine if you want to offer the property at list price or at a profit. You can track changes to the project costs and what happens to the value of the property. You can set an optimal Maximum Purchase Price. You can track repairs over time and set a final cost per repair. You can analyze the cost to do repairs in-depth to your exact property and determine what percentage of repairs can be done before your property breaks even. The maximum purchase price calculator gives you an executive dashboard to analyze fixed costs, repair costs, profitability to determine the Maximum Purchase Price you should offer for your next rehab property. What is included in House Flipping Spreadsheet? This product includes: - A powerful excel worksheet for house flipping investors to calculate detailed repair cost estimates and analyze deals to determine the Maximum Purchase Price (M.P.P.) to offer for a potential investment property. - Over 200+ projects you can incorporate into your spreadsheet - All of the estimated repair costs for each project - User friendly worksheet with clear instructions and detailed visuals. - You can also use this worksheet to create your own home repair project spreadsheets for your own portfolio properties - Comprehensive help file and tutorial included. - Create a complete projects spreadsheet from start to finish. No prior project management experience necessary. - Track changes in the estimate as you go. You can create your own simple spreadsheet for your own portfolio properties or create your own customized spreadsheet for your own projects. - Create a spreadsheet for each project from start to finish, no prior project management experience required. - No prior project management experience required, create your own project spreadsheet from start to finish. You can create a spreadsheet for your portfolio properties with these steps: - Click the button "Quick Start" to create a blank worksheet with all the project data already entered. - Click the button "Next Step" to enter a title, description, and tags for your project. - Click "Projects" to add projects into your spreadsheet. - Click
