black sabbath greatest hits torrent download black sabbath greatest hits torrent downloadQ: Javascript to change the script for a Facebook page I'm making a web app and in its middle of usage, I want to share a link to a page that allows people to use the app. In that page, it is a script that says "If your from my country, you can use this. If you're not, you won't". I want to change this script to be something like "If you're from my country, you can use this app, if you're not, you won't". How can I do this? I'm looking forward to any help, Thanks A: You can use FB.getLoginStatus() function and check permissions you've got. Once you've got that info, you can display right message to users based on their country and thus give them an ability to use your app. Else, you may put that script on your own page and use it by communicating with FB directly (which is not recommended for obvious reasons). Reducing the cisplatin content of Cremophor EL: a case study. The cisplatin content of Cremophor EL and its impact on the bioavailability of cisplatin were investigated. Cisplatin powder was dissolved in water with or without Cremophor EL. The cisplatin concentrations in the aqueous solutions were determined by high-performance liquid chromatography. The effect of Cremophor EL on the pharmacokinetics of cisplatin was also determined in rats. The cisplatin content of Cremophor EL was investigated after storage for various periods at 4 degrees C or 20 degrees C. The cisplatin concentration of Cremophor EL solutions prepared by dissolving cisplatin powder in water was 2.8 mg/mL, a significantly higher concentration than that of cisplatin solutions without Cremophor EL (0.7 mg/mL). Therefore, the cisplatin concentration could be reduced by dissolving the cisplatin powder in water without Cremophor EL before infusion into patients. The bioavailability of cisplatin increased with Cremophor EL in rats, indicating that Cremophor EL potentially induces high-level platinum accumulation in tumors and therefore enhances anticancer effects in clinical applications. The cisplatin content of Crem
