## Free Link Checker Crack+ Free License Key Free For PC

=====  
Free Link Checker is a desktop tool that does broken link check. You specify a starting URL for checking and the link validator software finds dead links, invalid HTTP redirects and other problems on a website or a single web page. A broken link report is provided after validation. You can set the search for broken links to be recursive, and this way it will validate the whole webpage for old and dead HTML links. The program includes HTML links spider and broken link analyzer. Free Link Checker provides various settings for broken link check, displaying invalid links report, tracking progress, setting up authentication (username and password) and proxy. It is possible to analyse links from the selected domain only, get only a summary of broken links, or receive a full report on dead or obsolete URLs (originating from a href, img, etc. HTML tags), invalid HTTP redirects, directory redirects, forbidden links, etc. Features: =====  
Build in broken link checker  
Syntax highlighting  
Compatibility with Microsoft Internet Explorer  
You can set options for ignoring links from specific folders  
Several settings for checking links and displaying results  
Can define the path to the .NET Framework 2.0 redistributable files  
Can analyze a web page for broken links, or a whole website  
You can set the minimum and maximum age of a link  
You can define how many dead links will be ignored  
You can set authentication (username and password)  
You can use HTTP proxy  
You can save results  
You can view the report in HTML format  
You can preview a report before it is saved  
You can export the results to a file  
You can receive a full report on dead or obsolete URLs  
You can see a list of all URLs that failed  
You can search for specific URLs  
You can set the report to include only URLs that have been accessed for at least a specific time  
You can set the number of days between a URL update check  
You can check URLs for links that do not work, even if they are 404, etc.  
You can get a summary of URLs that have been checked  
You can get a list of URLs that have been successfully

## Free Link Checker Product Key Full
