Clash Royale Hack Tool 2019 Free Download No Human Verification.Q: Spring @Transactional is not supported on try-with-resources resource I'm just learning about how to use @Transactional with a class that wraps a resource (from

this post) and I want to use it because it appears to be the most performant way to use Spring to manage transactions without using try-with-resources (see this post). This is my original code that throws an exception: `@Service public class MyService{ @Autowired private SomeType resource; @Transactional public void doSth(SomeType resource){ try{ //do something }finally{ resource.doSth(); } } }` but if I change the code like this: `@Service public class MyService{ @Autowired private SomeType resource; @Transactional public void doSth(SomeType resource){ try{ //do something }finally{ resource.doSth(); } } }` It runs as it should without throwing an exception. The only difference I can see is that the former uses the new try-with-resources feature which is not available in Java 8. My question is, is there a way to use the try-with-resources feature within a `@Transactional`? Edit: Maybe the approach I'm taking is wrong anyway. I'm not really sure as I'm pretty new to Spring, but from a few hours of research: f988f36e3a
