Gremea Duplicate Finder is a handy utility designed to help you out in this situation. It can locate identical files that are stored in more than one place on your PC, and it then allows you to delete them safely. Slim and streamlined application suitable for novices One thing is clear from the start – Gremea Duplicate Finder is designed to provide users with a simple, no-nonsense cleaning solution, without complicating matters unnecessarily. It features a minimalistic UI, and its clear layout should make it easier for first-time users to get the hang of things. However, even though a basic duplicate scan can be configured without too much trouble, it would have been great if the process of setting up filters were documented, as some users may find it to be somewhat confusing. Useful tool for dealing with duplicate files Once you have added all the folders that need to be analyzed, you also have the option of limiting the scan to certain file types. Unfortunately, though, these settings cannot be saved for future sessions. The application organizes duplicate items into groups and displays their location, size and creation date. However, the program cannot mark files for removal automatically. It is also worth noting that the scanning parameters cannot be customized in any way, which means it is not possible to alter the rules used by the software to determine whether or not two files are identical. Basic duplicate cleaner for undemanding users All in all, Gremea Duplicate Finder is a relatively simple utility that could be a great choice for inexperienced users who wish to find and remove duplicates without too much fuss. It can certainly get the job done, but it lacks a few important features. Multi2Media is a program that helps you to organize and manage your computer and mobile media files. So far it has worked well for me. It goes without saying that this is a little program that has been around for many years. You can expect everything from a bad to good update, but I have never had a problem. I know that it has not been the last word on most duplication/compression software, but it has been quite good, and that is what matters. It is good value for money. In my opinion it is the best around. So if you are looking for a duplicate scanner, and just not sure what software to use, I would say that Gremea Duplicate Finder is worth looking at.
