You can create a selection, edit it, and move it around—all with a few clicks. The Quick Selection tool selects an object or an area of an image based on a color, intensity, or pattern, and the Selection Brush tool lets you make select areas and line them up to get a great look. The Content-Aware Fill tool fills areas with matching colors, textures, or patterns, so you don't have to manually select the areas you want to fill. If all you need is a layer of green grass on a rainy day, you can push the green color around with the Gradient tool to create the perfect look. Photoshop is perfect for beginning and experienced users alike. From artistic explorations and editing shot RAW files, to reporting, graphic design, and preparing for presentations, the suite is an essential tool for any editor. Making things even easier, Adobe announced that the next version, 2020, will have a single-license option, a first for Photoshop. License buyers pick up all the features of every product in the bundle, a much smarter and cost-saving way to create. When it comes to pricing, people have a lot of options ranging from free trial subscriptions to more fee-based options. Photoshop will appeal to various users, depending on what their setup will be. However, as long as one subscribes to Creative Cloud, they should get the best version, and users can only pay for one version at a time. The new version of Adobe Photoshop is also powered by Sensei, artificial intelligence. It allows users to make adjustments to their subjects by finding the perfect balance of the contrast, color, exposure and other settings. It's all done on-the-fly and in a matter of seconds, with the effect virtually invisible to the eye. In the previous versions, users had to adjust each of those parameters one by one. Photoshop Elements 13 and Photoshop CC 2019 both offer a feature that gives control to the AI, so users can adjust the settings for the most effective adjustment by point and without hassle, waiting for the AI to find the best settings. Photoshop CC 2020 will offer this feature, too, and it will be compatible with Photoshop Elements.
