

The gear rack for the THG40 rack box is manufactured from sendzimir galvanised steel plate. The rack is 40mm in height, with a wall thickness of 3 mm.

The rack is available in various lengths, depending on the section size. The rack has $\phi 6.3$ mm holes for the coupling pieces which connect it to the pull-push tube ($\phi 27 \times 1.5$ mm or $\phi 32 \times 1.5$ mm) by means of clamping bushes.

Screen brackets can be supplied as an option if the gear rack is to be used in combination with the THG40 (1:1) rack box.

Other rack lengths are available on request.

Description	F [N]	L [mm]	m [kg]	Article number
