CSVfix is developed as an Open Source command-Line stream editor specifically designed to deal with CSV data. CSVfix CLI Reference: CSVfix CLI Reference. CSVfix - command line help & usage: CSVfix - command line help & usage. CSVfix - command line usage examples: CSVfix - command line usage examples. 2 Comments for this Post You can create a batch file in Windows using Notepad and any other text editor, but you have to be careful with embedded characters. I found this great tool to write batch files: In the simplest case you can use the following syntax: @echo off Setlocal EnableDelayedExpansion Rem... Or just leave your batch code without any comments and add the statement setlocal enabledelayedexpansion. This is an example with batch file I created to generate a file "sample.csv" in specific path (the folder name can be adjusted as needed): @echo off Setlocal enableDelayedExpansion if exist "%~dp1" (echo %~dp1) else (echo %~dp0) for /f %%i in (data.csv) do (echo %%i>>"%~dp0%~nxi") Rem for each %%i in the data.csv file, copy to "sample.csv" Rem echo %%i >>"%~dp0%~nxi" Rem clean the content of "sample.csv" file and delete it. (echo %~dp0%~nxi)>"" Rem clean the directory "data" in the working directory (del "%~dp0data")>nul Rem remove all files in "data" directory (rd /s /q "%~dp0data")>nul Rem remove "data.csv" and "sample.csv" from "data" directory (rd /s /q "%~dp0data*.csv")>nul Rem add the "data.csv" and "sample.csv" file in the directory "data" (copy /y "%~dp0data*.csv" "%~dp0data")>nul Rem remove the "

What's New in the?

CSVfix is a command line application written in C++/CLI for Windows. It provides a simple and easy to use file manipulation system. It can read, write, modify and copy CSV (comma-separated values) data. CSVfix is a GUI-less program. It has no other interface than the console. You have to know how to use the command line interface to work with CSVfix. The utility supports the UTF-8 encoding and can handle more than one byte character. CSVfix supports many of the windows functions like moving, renaming and copying. CSVfix has a built-in (XML) parser and it can process many files at a time (up to 16). It can load files from a disk or from a ZIP archive. Some of the main features of CSVfix:

- Enable users to work with CSV files in command line.
- Read, write, move, modify or copy CSV files
- Can open files from various formats, like XLS, XLSX, CSV, TXT, PGM, WPL, PBF, TAB, RTF, DAT and CSV
- You can open files from either a disk or from a ZIP archive.
- Parses files from different formats like XLS, XLSX, CSV, TXT, PGM, WPL, PBF, TAB, RTF, DAT and CSV
- Enables users to work with multiple files at a time (up to 16)
- Has a built-in (XML) parser that can parse other formats like XLS, XLSX, CSV, TXT, PGM, WPL, PBF, TAB, RTF, DAT and CSV
- Provides easy way to search for data within files
- Provides a handy way to parse multiple files at once
- Supports UTF-8 encoding
- You can save your changes to a file with the same name as the original one.
