GadgetBuddha is a simple software program for generating personalized calendar. It helps you to set events and holidays and display them in a beautiful way on the desktop. You can easily use the gadget just by one-click. It is very easy to install, use and uninstall it. No registry is needed. It is simple and needs no installation. It is a free and useful application. UFO Launcher - Where are they? UFO Launcher will help you to find all the UFO flying near you, planet, space or star. This is a special and attractive program specially designed for the people who love finding UFOs in the sky. This is the latest and most powerful application designed for finding and tracking UFOs. This program does not find UFOs by using computer vision methods like blob matching. It tracks UFOs as a GPS object, much easier than the other programs. UFO Launcher can find an object from anywhere in the world. It can also read tracks and find the object which you are tracking, much easier than other programs. It is based on the popular game The Flashlight. Addons.com is a powerful extension manager for Firefox with a lot of features. It is based on the same idea of a content manager that we use to manage the extensions inside of Firefox, it has much more tools. It supports lots of extensions and you can manage them easily. Here are some of the features that are available to you in Addons.com:-Clinical significance of coagulation factors and thromboelastography in septic shock patients. To evaluate the clinical significance of thromboelastography (TEG) in predicting mortality and clinical severity of septic shock patients. A prospective, nonrandomized study. A teaching hospital, intensive care unit. Septic shock patients admitted to the intensive care unit. Patients were treated according to sepsis management guidelines. The associations of TEG variables with mortality, Acute Physiology and Chronic Health Evaluation (APACHE) II, and sequential organ failure assessment (SOFA) scores were examined. Receiver operating characteristic (ROC) analysis was performed to determine the best TEG variables to predict mortality. Of 143 patients, 37 patients (26%) died. The TEG variables correlated with mortality. In ROC analysis, maximal amplitude (MA) was the best TEG variable to predict mortality. The sensitivity, specificity, positive predictive value (PPV), and negative predictive value (NPV) of MA for predicting mortality were 84.6,
